AI VALUE IN BANKING

AI went from 3% to 79% of bank annual reports in six years.

268 of 338

US bank 10-Ks filed in 2026 mention artificial intelligence.

29%

mention generative AI, up from 0% in 2023.

Share of 10-K annual reports filed by US commercial banks and thrifts (338 to 537 filers a year) that mention each term. 2026 counts filings through Oct 26. [1]

AI VALUE IN BANKING

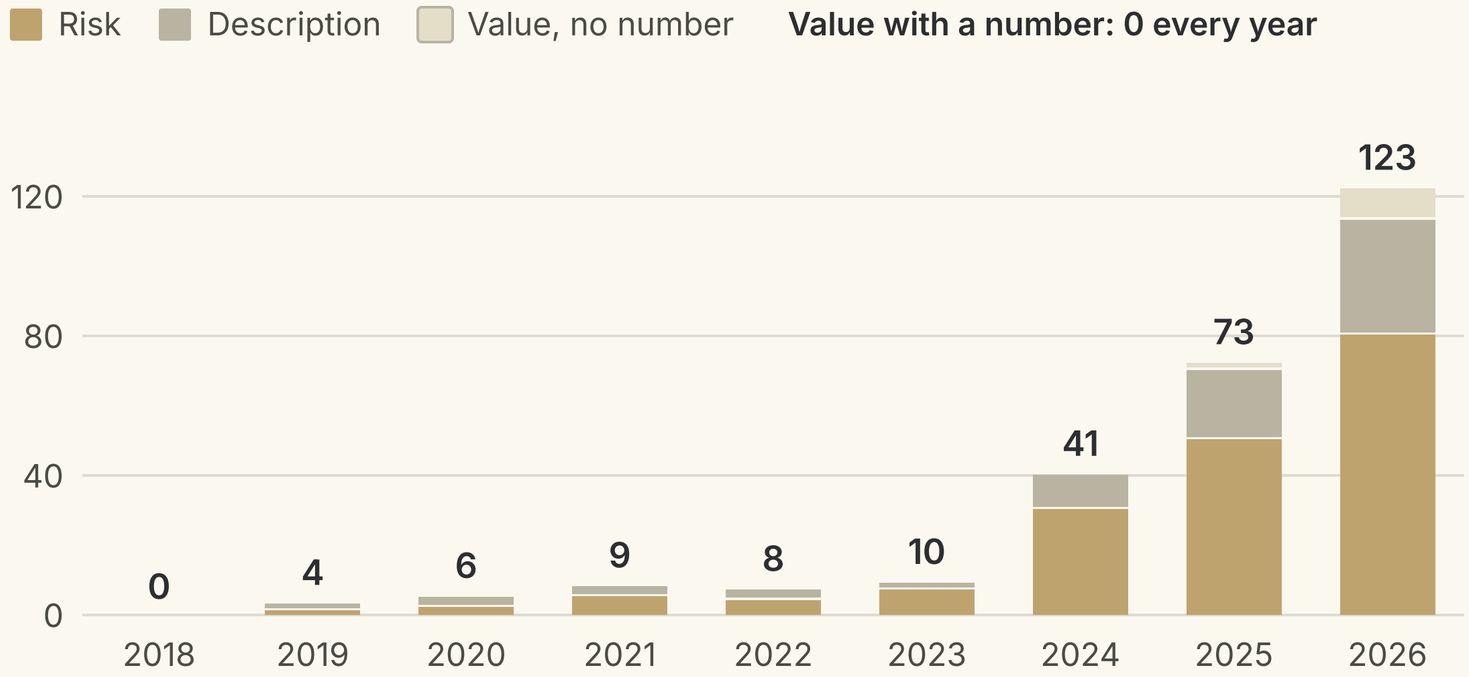

In their SEC filings, the largest banks describe AI as a risk, never as a number.

0 of 274

AI sentences put a number on the value of AI.

68%

are risk language: what could go wrong, what competitors might do.

Every sentence mentioning AI in the 10-Ks (main document and Exhibit 13) of JPMorgan Chase, Bank of America, Citigroup, Wells Fargo and Capital One, filed 2015 to 2026, sorted by fixed keyword rules. All 274 sentences are in the data file. [1]

AI VALUE IN BANKING

Most AI value isn’t negative; it’s unmeasured.

Finance leaders’ AI use cases, by reported return [5]

The 6% segment is break-even.

7%

of organizations have established AI ROI [6]

12%

of bank AI use cases report impact on an operating KPI [2]

1%

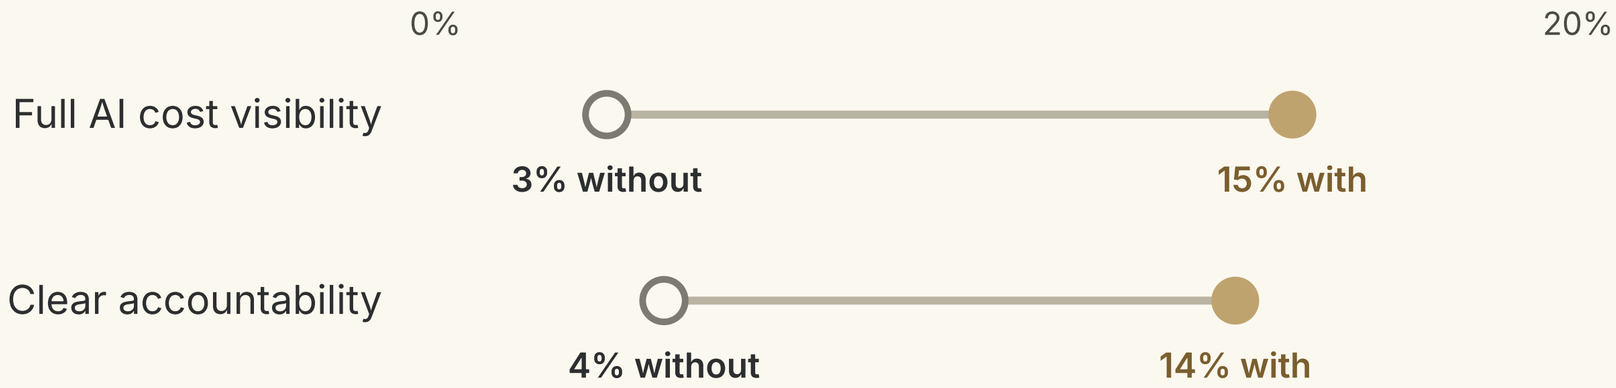

of bank AI use cases disclose a financial return [2]

Gartner survey of 160 finance leaders as reported by CFO.com (Gartner’s release could not be opened) [5]; KPMG global survey of 2,145 leaders [6]; Evident tracks the 50 largest banks [2].

AI VALUE IN BANKING

The organizations getting ROI are the ones that measure it.

Share of organizations reporting established AI ROI [6]

4×

Banks capturing AI value at scale are four times as likely to track and report AI results [7]

2×

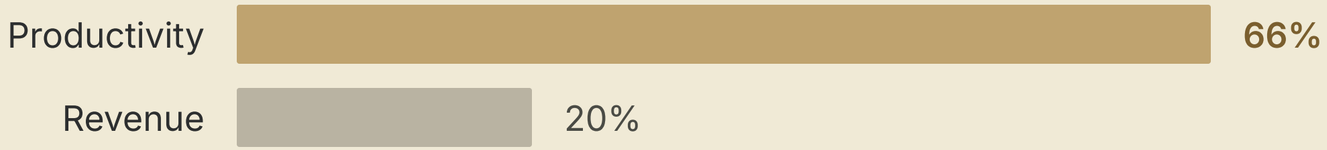

AI high performers are twice as likely to have a defined process to measure AI’s impact [8]

KPMG Global AI Pulse Q2 2026, n=2,145 [6]; BCG and Google Cloud, Jan 2026 [7]; McKinsey State of AI 2026, n=1,719 [8].

AI VALUE IN BANKING

AI frees time before it saves money, so track where the time goes.

Organizations reporting AI gains in... [9]

30,000 minutes

a day saved by automated call summaries at one credit union

→

“$3 million worth of time”

a year, as the vendor story values it

→

Cash only when

the time is redeployed or the cost is removed. Until then it is capacity.

Deloitte State of AI in the Enterprise 2026, n=3,235 [9]; PenFed customer story, Salesforce, Jan 2026, vendor-reported [10].

AI VALUE IN BANKING

A credible AI value report shows what most banks can’t.

Four in five banks now mention AI in their annual reports; the largest never quantify its value there, and almost none quantify it anywhere else.

ILLUSTRATIVE, NOT REAL DATA

Use case	Expected	Realized to date	Run cost	Value type	Evidence	Decision
Member service assist	40,000 hrs	22,000 hrs, redeployed to call backlog	$	Capacity	Measured (holdout group)	Scale
Fraud triage	$ losses avoided	$ (finance signed)	$	Risk	Finance-validated	Scale
Document summaries	Avoided hires	Not yet measured	$	Cost avoidance	Estimated	Fix

1 Realized against expected

2 Net of run cost

3 Value types never summed

4 Hours have a destination

5 Finance signs the dollars

6 Scale, fix or stop

“Scale what delivers value and optimise or stop what does not.” Deloitte, Sept 2026 [11]
